1. What's in website?

a. **Sign Up**
   New to musical map. Signup and save your history and suggest changes
b. **Log in**
   Already have an account. Log in to see history and have better experience.
c. **About Us**
   Want to know about the developers contact them right here from the bottom of the page.

2. **System specifications**
   The website will work on any system with browser later than IE 7. It is assumed that the operating system and other underlying pieces of software on the user side are free from any error which may affect the functioning of this system.

3. **Browsing the website**

Home: Redirect the website to home page.

Add: Suggest a new place

City: Reload map to specific city (Currently only Indore)

About Us: See information about the website

Zooming
Use browser shortcut (Default: Ctrl+scroll/num +)
Use scroll button on map or the button in bottom right corner
Use the full screen button at top right to zoon to full screen
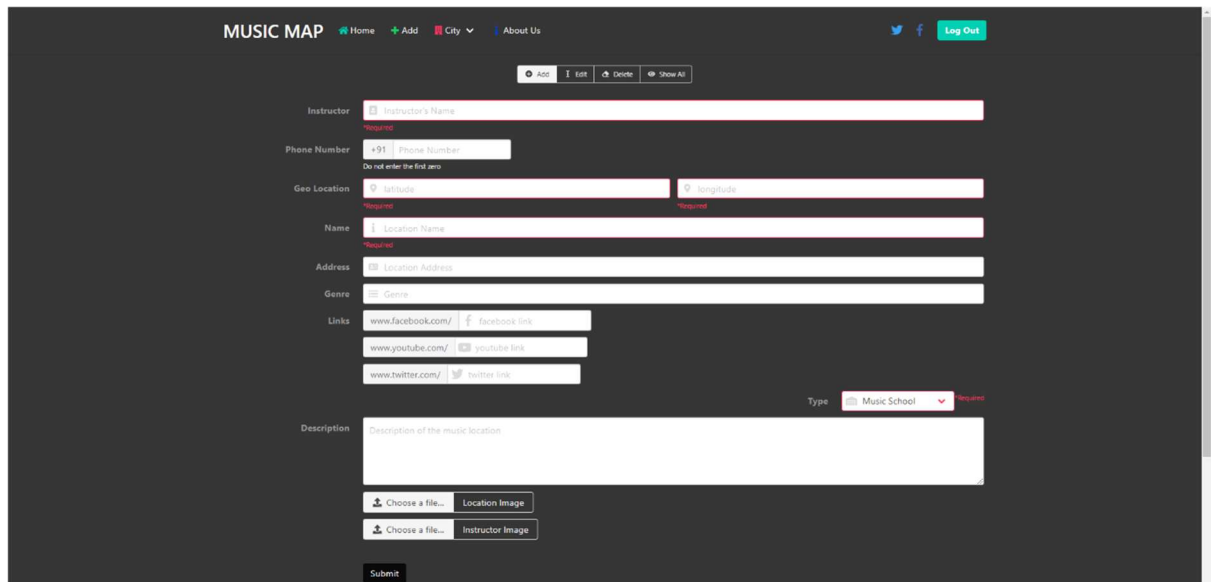

4. Browsing the Android App

Run the Music map on your android. Navigation are similar to the website except you cannot access the admin page. Double tap on pinch in or out to adjust the zoom. Use Android experience to access the website.

Navigation bar is transferred to Burger menu.

You can access the Home, Login, Signup, city and about section here.
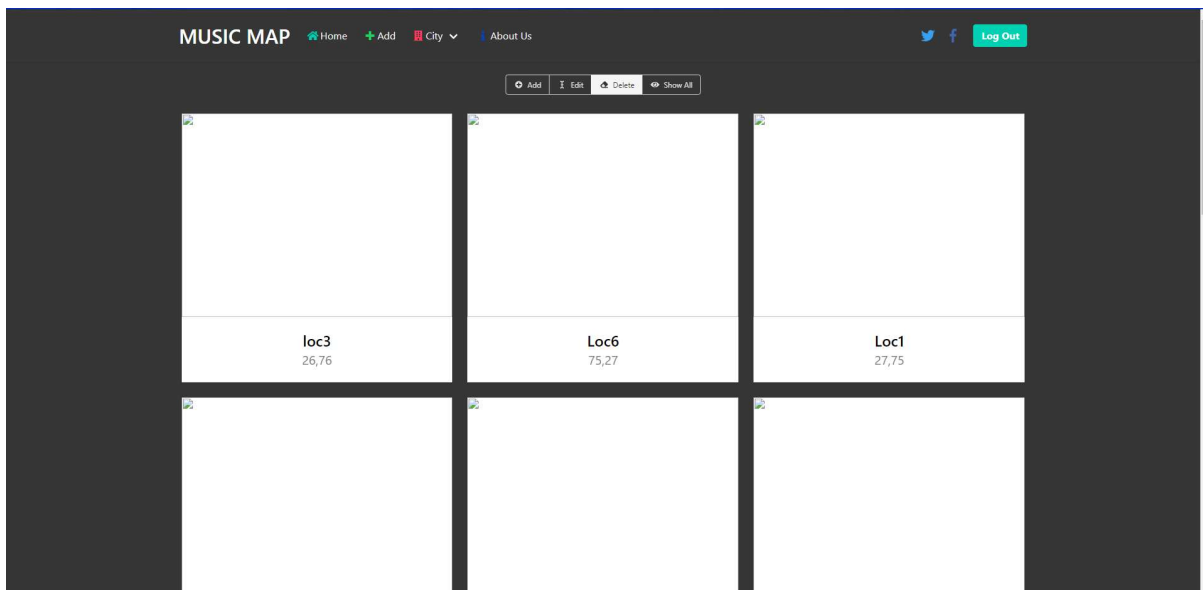

5. Admin Section
   Add Page

On successful authentication the admin page, admin can access the panel to add the places. Admin is required to fill the required details as required in the form. On clicking submit data will be loaded to the database and will be reflected in the map.

Delete Page
Added places will be displayed as card. Click on the card to delete that place from map.

Edit Page

Click on the card to edit the place. It will redirect to the add page where previous information is already filled.
